

COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	276,249
Total persons of high, medium, or unknown risk	272,602
High/medium/unknown risk still being monitored	20,227

Persons tested: Includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	5,362,516	21,319
Positive	705,965	8,650
Negative	4,649,399	12,624
Inconclusive	7,152	45

Cases: people with positive PCR or antigen test result

Total cases	714,615
Florida residents	705,965
Non-Florida residents	8,650

Type of testing	
Florida residents	705,965
Positive by BPHL/CDC	25,169
Positive by commercial/hospital lab	680,796
PCR positive	687,700
Antigen positive	18,265
Non-Florida residents	8,650
Positive by BPHL/CDC	257
Positive by commercial/hospital lab	8,393
PCR positive	8,155
Antigen positive	495

Characteristics	
Florida residents hospitalized	44,623
Florida resident deaths	14,628
Non-Florida resident deaths	175

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents

Traveled	5,906
Contact with a known case	259,877
Traveled and contact with a known case	6,245
Neither	433,937
No travel and no contact	90,391
Travel is unknown	243,000
Contact is unknown	184,657
Contact is pending	140,027

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

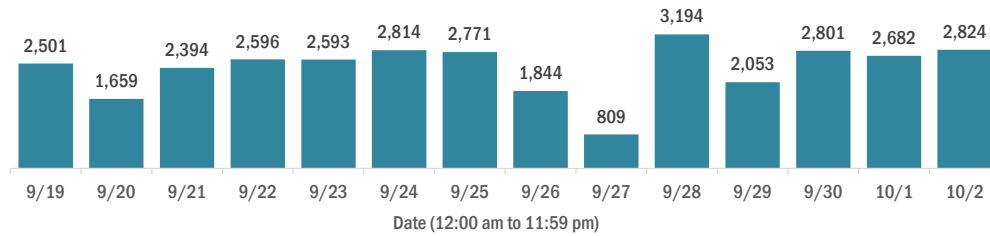

COVID-19: cases and laboratory testing over time

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

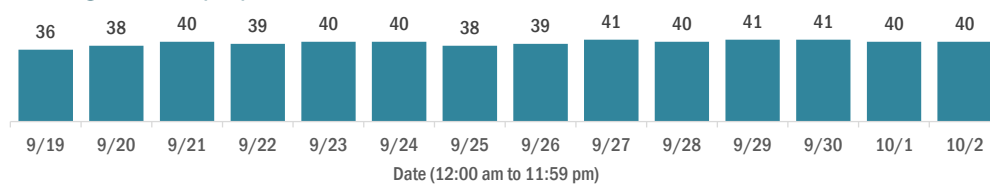

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

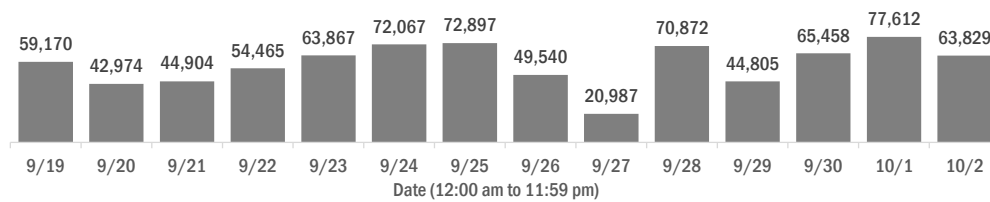

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

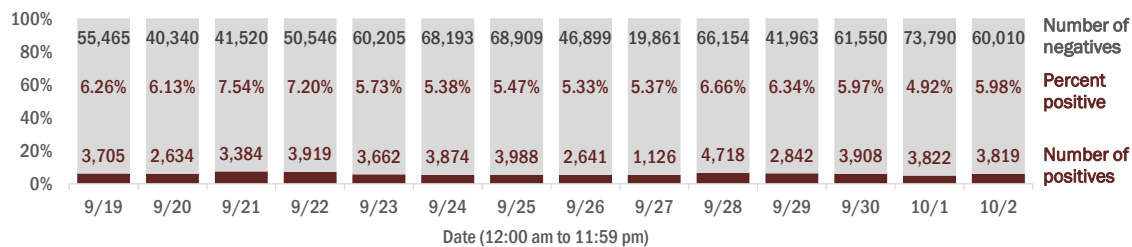

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.92% to 7.54% over the past 2 weeks and was 5.98% yesterday.

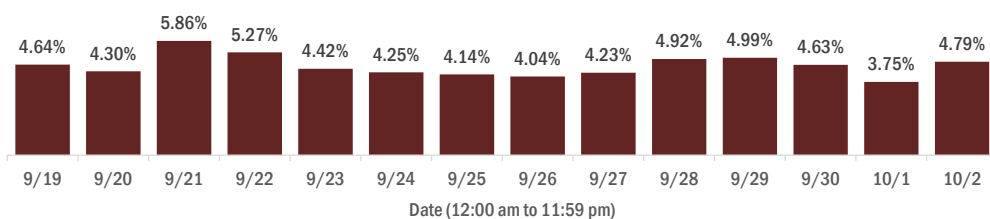

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.75% to 5.86% over the past 2 weeks and was 4.79% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 705,965 Florida resident cases

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

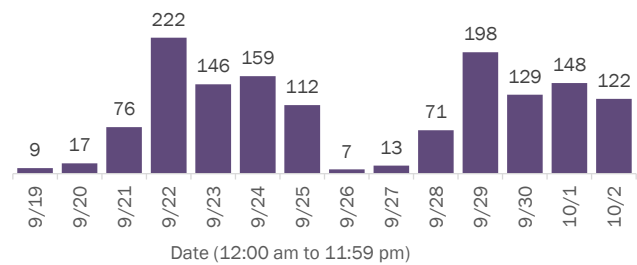

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 2, 2020 verified as of Oct 3, 2020 at 08:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
